

Asthma Living Guideline Search Narrative - Outcomes & Audit

March 2003

No key questions were available in March 2003 and no searches undertaken.

New key questions (September 2003) - Not searched on.

1. What interventions influence the outcome in asthma, in order to describe significant interventions, which should be considered for audit of the process of care.
2. What outcomes are influenced by the process of care (excluding pharmacotherapy), to assess significant processes which should be considered for monitoring? The implications of findings from other groups can be incorporated at a later stage if appropriate.
3. How much is outcome influenced by demographic, disease and patient factors, to evaluate important confounders, on which information might need to be available?
