Have your say in identifying how epilepsy services in Scotland are developed by joining this one-day interactive event.

Presentations, open discussions and workshops will focus on:

- identifying key priorities and objectives for action to improve care and outcomes for adults with epilepsy based on the recently published SIGN guideline on Diagnosis and Management of Epilepsy in Adults
- identifying and agreeing strategies for implementation based on the agreed objectives.

This collaborative event is supported by SIGN, the National Neurological Advisory Group (NNAG) and the Scottish Epilepsy Centre.

For those unable to attend the meeting in person there may be an opportunity to join by videoconferencing. Please let Lesley Forsyth (lesley.forsyth@nhs.net) know as soon as possible if you are considering this option.

For further information please contact:
Mrs Lesley Forsyth
