Search strategies used for specific key questions

The following are the main Medline strategies used for this guideline. All conventions and symbols are from the Ovid implementation of Medline. Strategies used in other databases were substantially the same, though different terminology may have been used to take account of different thesauri used in non-Medline databases. Search filters were added to identify studies of a particular type (systematic review, RCT, economics etc.) Listings of the search filters used by SIGN can be found on the SIGN Web site.

Database: Ovid MEDLINE(R) ALL <1946 to October 25, 2022>
Search Strategy:
----
1   *Diabetes Mellitus, Type 1/ (69875)
2   t1dm.tw. (5939)
3   diabetes.ti. (263886)
4   or/1-3 (287691)
5   limit 4 to (consensus development conference or consensus development conference, nih or government publication or guideline or legislation or practice guideline or technical report) (973)
6   limit 5 to (english language and yr="2018 -Current") (177)
